Chapter 1

File Index

1.1 File List

Here is a list of all documented files with brief descriptions:

/Users/ryantabler/Documents/Miscellaneous/Doxy/functions.php	
File containing all functions necessary for website to interact with database	3

Chapter 2

File Documentation

2.1 /Users/ryantabler/Documents/Miscellaneous/Doxy/functions.php File Reference

File containing all functions necessary for website to interact with database.

Functions

- [check_param \(\)](#)
Check values in form to make sure they are all filled in. Puts information into variables: \$userFirstName, \$userLastName, \$password, \$email, and \$phone.
- [Add_user](#) (\$userFirstName, \$userLastName, \$password, \$email, \$phone)
Inserts variables taken from form into database.
- [Login \(\)](#)
Checks values in login form to make sure they have been entered and puts them into variables: \$email and \$password.
- [Checklogin](#) (\$email, \$password)
Checks for login credentials in database.
- [IsChecked](#) (\$chkname)
Returns which checkbox has been selected in upload item form.
- [upload_item \(\)](#)
Takes in information through form, including email, item name/price, item image and whether the item is for sale and uploads it to the database.

2.1.1 Detailed Description

File containing all functions necessary for website to interact with database.

2.1.2 Function Documentation

2.1.2.1 Add_user (\$userFirstName, \$userLastName, \$password, \$email, \$phone)
